CONFERENCE DATA SERVICES
Event Production Services.

CONFERENCE DATA SERVICES, through careful application of cutting edge technology provide numerous benefits to maximise your next event.

The philosophy behind the CDS Event Production Service is to enhance and add to your meeting, event or conference by assisting with the technical management of the show and ensuring that you get you the best possible result – both technically and financially.

SERVICES

Technical event management, Conference audio recording, PowerPoint presentations, CD & DVD duplication, Graphic design & layout, Web design & hosting.

PRE-EVENT PLANNING

CDS will work closely with you to plan and design the operational aspects of your conference or meeting. We will assist with the production of run-sheets, cue-sheets and floorplans for your team, the venue and the audio visual operators. We will also work closely with your preferred PCO (Professional Conference Organiser) to design the event that YOU want.

EVENT THEME TECHNICAL PRODUCTION

Whatever the theme, CDS can provide the creative edge to deliver that theme for the best possible budget. Lighting, stage sets and centre-pieces are just the start to making your event memorable and spectacular!

STAGE SET DESIGN

CDS will provide computer-generated diagrams showing just how your event will look before you even get there – allowing you to choose the style and concept's you want while taking out the risk that comes from not knowing just how it is going to look on the night.

AUDIO VISUAL CONSULTATION

CDS bring to the table over a decade of experience in audio visual equipment hire and planning. We can either provide equipment through our network of trusted AV companies, or we can work with your preferred or in-house supplier to get the best result. Our job is to work as your consultant so we will analyse the audio visual quote from any supplier and review it in conjunction with your requirements. This ensures that you only pay for what you need!

ONSITE DATA MANAGEMENT

Our I.T. background is second to none in the industry. Using our Event Network Technology we will ensure that your presenters individual needs are catered for and they feel at ease. We make sure that the right presentation makes it to the right room at the right time while also giving you the piece of mind that comes with regular backups and pre-show presentation tests.

ONSITE DELIVERY

The CDS Technical Director will be there every step of the way to ensure that the installation by your selected audio visual supplier goes to plan. The Technical Director will then stay with you for the duration of the event and remain your liaison with the audio visual operators to make sure that you interests are represented at all times.

CAPTURE YOUR CONFERENCE

Ask your CDS consultant about how we can help you "CAPTURE YOUR CONFERENCE" to provide a memorable experience for your delegates and even generate additional revenue from your event!
